

2010: DRAWING TO A CLOSE

QUARTERLY QUOTE

“Opportunity is missed by most people because it is dressed in overalls and looks like work.”

-Thomas Edison

VOLUME 1, ISSUE 4

SEPTEMBER, 2010

Holiday Gift Idea!

Looking for a neat idea for gifts this holiday season? What about a coaster personalized with your company logo or design? Something your customers will use throughout the year and see your logo or design every day!

Coaster boxes are available with Happy Holidays text or blank. Coasters are available in Clear Acrylic & Alder Wood.

News You Can Use!

We'd like to share a recent experience with you regarding damaged freight...

If freight arrives at your dock damaged, note the bill of lading before signing. You will have a slim chance of being reimbursed for damaged goods in a claim if the bill of lading is not noted. We created a flyer (seen in below inset) to put on all freight leaving our building warning

our customers about this matter.

Stay tuned for more News You Can Use!

Golf ball with dimples!

FRAGILE – HANDLE WITH CARE!!

WARNING TO OUR CUSTOMER:

DESPITE THE VERY EXPENSIVE AND ELABORATE PACKAGING WE HAVE USED TO PROTECT YOUR ORDER, SOME SHIPMENTS OCCASIONALLY SUSTAIN INTERNAL DAMAGE IN TRANSIT.

DO NOT SIGN FOR THIS SHIPMENT UNLESS:

1. YOU FIRST INSPECT THE CONTENTS FOR DAMAGE, OR
2. YOU SIGN THE BILL OF LADING: "RECEIVED, SUBJECT TO LATER INSPECTION FOR DAMAGE"

IF YOU SIGN FOR THIS SHIPMENT WITHOUT TAKING THESE STEPS, THE FREIGHT COMPANY WILL ALMOST CERTAINLY DECLINE RESPONSIBILITY FOR ANY DAMAGE OCCURRING IN TRANSIT!!

Custom Belt Racks available for any martial art!

Employer Spotlight!

Don and Heike began Accurate Router Service (dba: Accurate CNC Services) in May 2003 with "Fat Man" (the big machine) by their sides. Neither had ever been self employed before but always toyed with the idea. Finally in 2003, they had the gumption to go for it.

Over the years, Don and Heike have molded and expanded this company with not just "Fat Man" by their sides, but now "Little Boy" and a CO₂ Laser. Don is always wanting more toys—so watch out. There is plenty more to come for Accurate CNC Services!

FAQ's (Frequently Asked Questions)

Every Newsletter, we will post a few frequently asked questions so that you may get a better understanding of how ACNCS works.

These questions are also available on our website, www.acncs.com. If you have a question you would like to ask, please contact us.

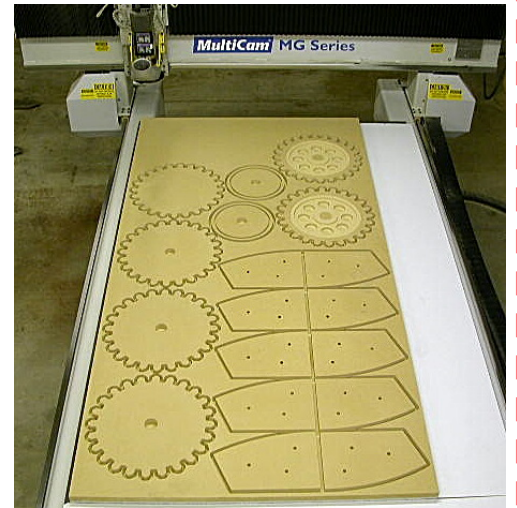

FYI... YOU use CNC every day! Printers are basically CNC machines!

• What is CNC?

- Computed numerically controlled (CNC) refers to the automation of machine tools that are operated by abstractly programmed commands encoded on a storage medium, as opposed to manually controlled via hand-wheels, levers, or mechanically automated via cams. CNC machines are augmented with digital computers and fitted with motors that move the controls to follow points that are fed into a system by a series of programs.

In modern CNC systems, end-to-end component design is highly automated using CAD programs. The programs produce a computer file that is interpreted to extract the commands needed to operate a particular machine, and then loaded into the CNC machines for production.

• How precise can you machine?

- We constantly maintain a tolerance of .005 of an inch.

What our Clients Say . . .

My name is Dave Franck and I am a CSM and process Engineer at MOR MFG. WE recently started doing business with Accurate CNC and it is a very open and pleasant relationship. I believe that Accurate CNC truly believes in the adage of a “Win Win” relationship between Accurate CNC and their customers. They go out of their way to make you feel at home doing business with them. Prices are fair, quality is very good, and delivery is excellent. You can’t ask for any thing else from a supplier.

Regards, Dave
